

Safety Net

because sometimes friends may not be what they seem

My name is David Grundy.

I am working on a new project called Safety Net.

It is for people with learning disabilities.

Part of it will be based in Calderdale.

It is about Mate Crime.

What is Mate Crime?

How do you know when a friend is really a friend?

Sometimes people pretend to be friends.

People are **NOT** your friend if they:

- steal your things
- hurt you
- make you do things you don't want to.

Has a 'friend' done these things to you?
What did you do when this happened?

Mate Crime might be something that the police would get involved in.

Can you help?

Can you help to stop this happening to others?

Please come to a drop in session at Heath Training and Development Centre in Halifax on Tuesday 22nd September from 10.00am – 12.00pm.

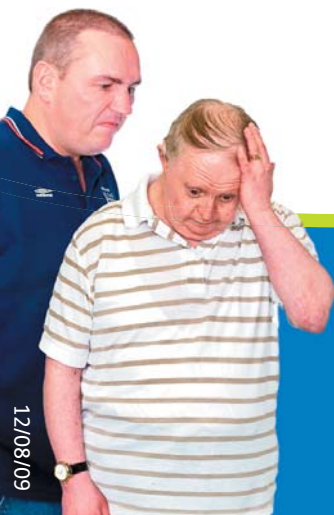

Phone me or email me if you want to know more.
